DIGITAL LIBRARY INITIATOR

Project Meeting Minutes & Monitoring Record

SMB Fatima Jinnah GGDC — Digital Library Transformation

Six-Month Project Meeting Minutes and Monitoring Record

Client: SMB Fatima Jinnah GGDC | **Project:** Digital Library Transformation
Collection baseline: 4,723 books | **Proposed duration:** Six months | **Proposed budget ceiling:** PKR 10,000,000

Important: These are illustrative meeting-minutes templates for the proposed project. They must be completed and approved using the actual meeting dates, attendance, discussions and decisions.

Month 1 — Project Kick-Off and Requirements Assessment

Meeting date: [Insert date] | **Chairperson:** [Insert name]

Participants: Departmental Sponsor, Principal/Nominee, College Librarian, IT Representative, Finance/Procurement Representative and Digital Library Initiator Project Lead.

Agenda: Confirm project objectives and scope; Review the existing manual library; Confirm the collection baseline; Identify infrastructure and procurement requirements; Establish project roles and communication arrangements.

Discussion Summary: The project team reviewed the proposed transformation of the 4,723-book collection. The need for a searchable catalogue, automated circulation, accurate inventory records, staff training and secure data management was discussed. The team identified the need to inspect existing registers, assess equipment requirements and confirm the quality of available bibliographic information.

Decisions: Conduct a site and infrastructure assessment; Review a sample of existing catalogue records; Establish a project governance and communication structure; Prepare the initial risk register and implementation schedule; Retain a manual fallback process during the transition.

Action Register:
• Provide access to accession registers | College Librarian | [Date]
• Assess infrastructure and network | IT Representative | [Date]
• Confirm procurement requirements | Finance/Procurement | [Date]
• Submit requirements report | Digital Library Initiator | [Date]

Next meeting: [Insert date] | **Approval of minutes:** [Name/date]

Month 2 — Solution Design and Infrastructure Review

Meeting date: [Insert date] | **Chairperson:** [Insert name]

Agenda: Review the requirements report; Approve the catalogue template; Discuss hardware and software specifications; Review hosting, security and data-export requirements; Check procurement and budget status.

Discussion Summary: The project team reviewed the proposed library management system, infrastructure requirements and catalogue structure. Particular attention was given to user permissions, circulation rules, public catalogue access, backup procedures and future data portability. The team also reviewed the need to distinguish one-time costs from recurring subscriptions and maintenance charges.

Decisions: Finalize specifications through the approved procurement process; Approve the catalogue template and quality checklist; Confirm the preferred hosting approach after technical review; Require documentation of licensing and recurring charges; Maintain the approved budget ceiling unless formally changed.

Action Register:
• Validate technical specifications | IT Representative | [Date]
• Approve catalogue fields | College Librarian | [Date]
• Obtain compliant quotations | Procurement Team | [Date]
• Configure the test environment | Digital Library Initiator | [Date]

Next meeting: [Insert date] | **Approval of minutes:** [Name/date]

Month 3 — Pilot Implementation and First Catalogue Batch

Meeting date: [Insert date] | **Chairperson:** [Insert name]

Agenda: Review system configuration; Check the first catalogue batch; Test barcode labels and circulation; Review staff training; Identify defects and data-quality issues.

Discussion Summary: The team reviewed the pilot implementation and the initial batch of book records. The catalogue template, barcode identification, book searches and circulation transactions were assessed. The team discussed incomplete bibliographic information and the importance of documenting exceptions instead of entering unsupported details.

Decisions: Continue catalogue processing in controlled batches; Conduct regular sample-based quality checks; Maintain a record of damaged, missing, duplicate or incomplete items; Prioritize issues that affect data integrity or circulation; Gather librarian feedback before expanding the workflow.

Action Register:
• Validate the catalogue sample | College Librarian | [Date]
• Submit catalogue progress report | Digital Library Initiator | [Date]
• Review account permissions | IT Representative | [Date]
• Complete pilot training | Project Team | [Date]

Planning target: Approximately 1,600 books processed, subject to actual progress and record quality.
Next meeting: [Insert date] | **Approval of minutes:** [Name/date]

Month 4 — Interim Progress and Catalogue Review

Meeting date: [Insert date] | **Chairperson:** [Insert name]

Agenda: Review cumulative catalogue progress; Examine record-quality results; Assess training and equipment status; Review budget expenditure; Address risks and schedule deviations.

Discussion Summary: The team reviewed progress against the six-month schedule, including catalogue throughput, barcode processing, data quality and staff readiness. The financial review covered expenditure to date, expected remaining costs and potential risks to the approved budget.

Decisions: Continue catalogue processing with quality checks; Assign an owner and due date to every high-priority risk; Submit an updated financial forecast where required; Obtain written authorization before using contingency funds; Escalate delays that may affect Month 6 go-live.

Action Register:
• Submit cumulative catalogue count | Digital Library Initiator | [Date]
• Validate classification samples | College Librarian | [Date]
• Review expenditure and forecast | Finance Representative | [Date]
• Update risk register | Project Manager | [Date]

Planning target: Approximately 3,200 cumulative books processed, subject to validated progress.
Next meeting: [Insert date] | **Approval of minutes:** [Name/date]

Month 5 — User Acceptance Testing and Go-Live Readiness

Meeting date: [Insert date] | **Chairperson:** [Insert name]

Agenda: Review collection reconciliation; Test the catalogue and circulation functions; Assess staff competency; Review backup restoration and permissions; Decide whether the system is ready for launch.

Discussion Summary: The team reviewed the remaining catalogue work, exception register, system performance and user feedback. Testing covered book searches, issue and return transactions, reports, account permissions and backup restoration. Outstanding issues were classified by severity.

Decisions: Close all critical defects before go-live; Document non-critical defects and agree on resolution dates; Obtain librarian and authorized client acceptance of the tested workflows; Verify backup and restoration procedures; Proceed to launch only after the agreed readiness criteria are met.

Action Register:
• Complete collection reconciliation | College Librarian | [Date]
• Witness backup restoration test | IT Representative | [Date]
• Close critical defects | Digital Library Initiator | [Date]
• Complete user acceptance checklist | Client Project Lead | [Date]

Next meeting: [Insert date] | **Approval of minutes:** [Name/date]

Month 6 — Go-Live, Handover and Project Closure

Meeting date: [Insert date] | **Chairperson:** [Insert name]

Agenda: Review final deliverables; Confirm collection and exception counts; Review final expenditure; Transfer documentation and administrative access; Confirm support arrangements; Approve project closure or record

outstanding conditions.

Discussion Summary: The project team reviewed the operational readiness of the digital library, staff training, user feedback and the final collection report. The handover review covered system documentation, asset records, catalogue exports, backup procedures, administrative access and support arrangements.

Decisions: Confirm whether the system meets the approved acceptance criteria; Record the final number of processed books and all exceptions; Transfer documentation and authorized access securely; Confirm support contacts, service arrangements and escalation procedures; Obtain formal acceptance from the authorized client representative; Track any outstanding non-critical work to completion.

Action Register:
• Submit final implementation report | Digital Library Initiator | [Date]
• Verify asset and documentation handover | College Administration | [Date]
• Confirm ongoing system administrator | College/IT Team | [Date]
• Approve closure or document conditions | Authorized Sponsor | [Date]

Project status: [Completed / Accepted with conditions / Further work required]
Next review: [Date, if applicable] | **Approval of minutes:** [Name/date]

Monthly Project Monitoring Dashboard

Complete this table using verified project records.

Monitoring Indicator	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6
Books processed	Baseline	Actual	Actual	Actual	Actual	Final actual
Catalogue quality	Assessment	Template	Sample	Sample	UAT	Final
Budget spent (PKR)	Actual	Actual	Actual	Actual	Actual	Final actual
Forecast remaining	Estimate	Updated	Updated	Updated	Updated	Final
High-priority risks	Count	Count	Count	Count	Count	Count
Staff training	Planned	Planned	Progress	Progress	Completed	Final status
Project status	Actual	Actual	Actual	Actual	Actual	Final status

Conclusion: Regular meetings and accurate minutes provide the accountability needed for a successful digital library transformation. This six-month meeting structure enables the department, college management, librarian, IT team and consultant to monitor progress, resolve issues and make informed decisions.
